

WALKER'S COMMITMENT TO CONSERVATION AND SUSTAINABILITY

WE ARE COMMITTED TO DELIVERING THE WILTON GREENFIELD HOUSING CODE

Walker is the first private developer to commit to the Wilton Greenfield Housing Code.

This will ensure greener, cooler streets with a target of 40% tree canopy, reducing the urban heat effect.

Homes will be built in line with the latest sustainability codes, with no gas, lighter-coloured roofs, and increased space for plants and trees.

PRESERVING AND REGENERATING NATURAL HABITAT:

Walker will dedicate more than one-third of the land to the NSW Government for preservation and regeneration of conservation land.

Wollondilly Shire's koala population is important to the region and to Greater Sydney, so we will provide more than 5,000,000m² of koala corridors to enable wildlife movement across new or existing habitat corridors.
